

PERIOPERATIVE CARE  
CONGRESS

NOV. 6-8, 2020  
TORONTO, ON

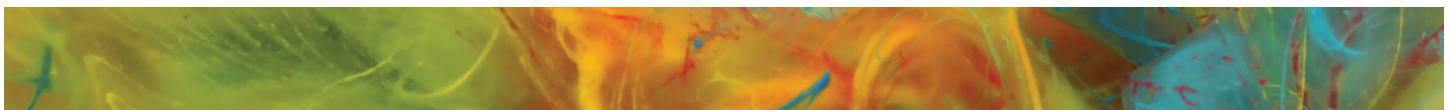

## Join us at the annual Perioperative Care Congress as we...

- Explain the role of preoperative evaluation
- Review how to optimally perform preoperative risk prediction
- Identify perioperative complications involving all organ systems
- Assess and manage all perioperative complications (intermediate to long-term)
- Examine research on global perioperative care and outcomes
- Debate current controversies in perioperative medicine
- Appraise current perioperative literature and discuss its integration into practice

Fireside Chats  
Campfire Session  
Research Competition  
Chain Reaction Panel  
Society Awards  
Debate

The PCC aims to bring together all health care providers (anesthesiologists, general internists and medicine sub-specialists, nursing, rehabilitation specialists and surgeons) involved in perioperative care and intermediate to long-term follow-up of patients after surgery.
